

Camp Pendleton airspace R-2503D Camp Pendleton, CA is under review. GA users flying into Oceanside Airport KOKB request a small area of the Camp Pendleton airspace to the south that abuts KOKB right hand pattern for RWY 24 downwind be allowed to navigate this area. Users would like to request that the class D airspace allow aircraft to cross over Waylan Lake (a visible downwind landmark that easily indicates camp pendleton airspace) and legally follow the San Luis Rey River without incursion as it is a major landmark and next to the airport. This has been a problem for years and the Marines have been very good about working with us but we would like to see if there can be a small change in the airspace as the Marines avoid this area anyway, knowing that it is a busy GA area. I do not know why this was never fixed in the past but it should get fixed now since the airspace is being reviewed. Users would be glad to work with marines on this.
